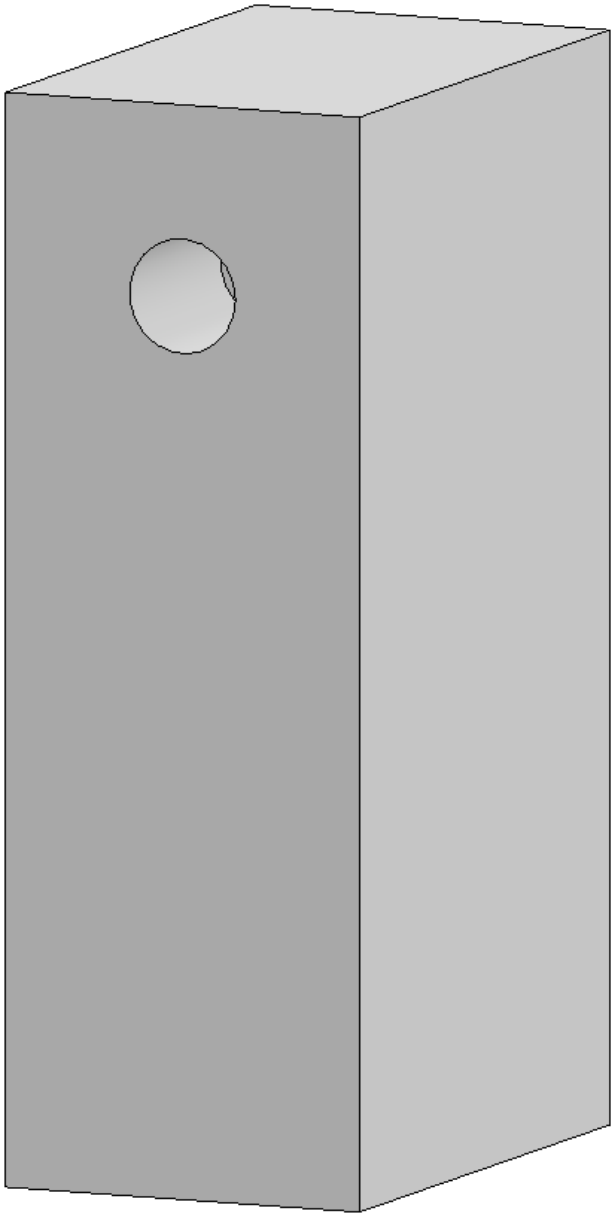
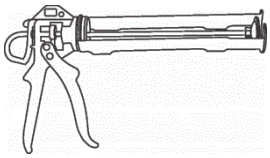
BLOK® RAIL
by Arktic

HAUT



MATERIEL NECESSAIRE

BLOK RAIL HAUT x2

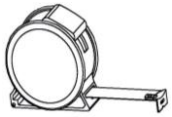


TACK GUN

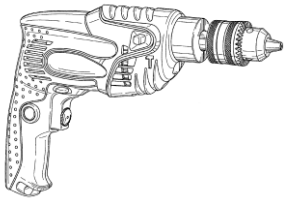
TACK 300 x1

CRAYON

MARTEAU



METRE



PERFORATEUR

VIS RAWLPLUG x2

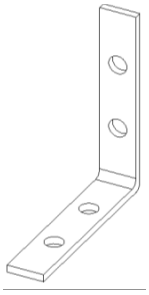
CHEVILLES RAWLPLUG x2

VISSEUSE +

EMBOUT 6 PANS 13

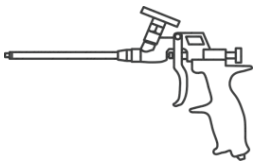
OU

EMBOUT TORX T30



EQUERRE RAIL x1

FOAM 490 x1



FOAM GUN

POSE DU BLOK® RAIL HAUT

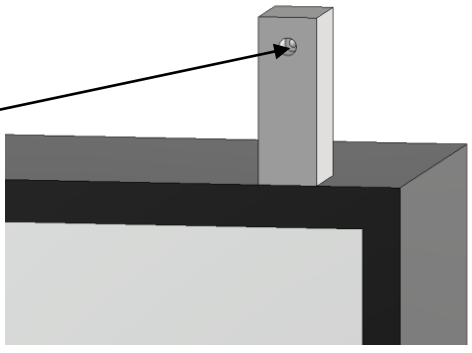
①  + 

Déposer de la colle Teck 300 sur la face du Blok Rail haut
(600mm de colle pour un calibre de cordon de Ø8mm)

② 
Positionner le Blok
Percer le mur à travers le trou

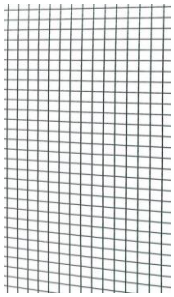
③ 
Engager le couple vis/cheville en les frappant
au marteau puis visser

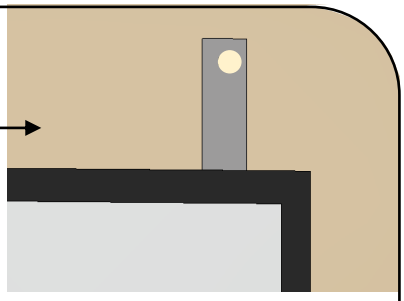
④  + 



Remplir le lamage de Foam 490 jusqu'à la surface du Blok

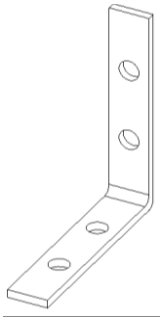
5

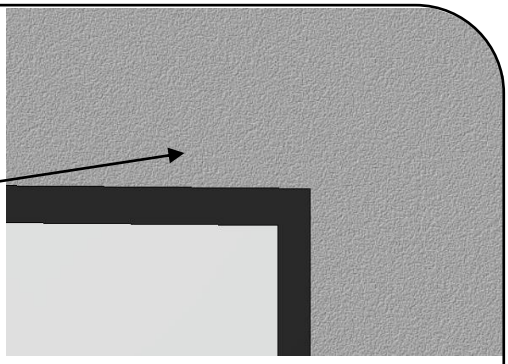




Ajuster l'isolation autour du Blok
Réaliser l'entoilage
Traiter la sous-couche
Appliquer l'enduit décor

6





Positionner l'équerre du rail sur le Blok
Visser l'équerre au Blok
